

Surveying Services

Foit-Albert Associates, Architecture, Engineering and Surveying, P.C. has the experience and capability to handle your Professional Land Surveying needs from start to finish – from the boundary survey for the conveyance of the property, through the preliminary planning stages, to the final record mapping. We have been providing professional services to our clients throughout New York State and Pennsylvania since in 1984.

Our expertise ranges from boundary surveys of residential and commercial properties, ALTA/ACSM Land Title Surveys, NYSDEC Environmental Easements, FEMA Elevation Certificates, to topographic surveys for architectural and engineering support. Foit-Albert's survey field crews are equipped with current state-of-the-art equipment supported by CADD graphic workstations, giving us the capability of producing efficient "field to finish" surveys. We operate in a variety of CADD platforms to remain flexible to our client needs.

Foit-Albert Associates can assemble a professional, experienced team that can best provide the level of quality of service our clients expect and require.

Firm Overview

Foit-Albert Associates is a full-service architecture, engineering and surveying firm that integrates quality design, functionality, and practicality so that the final product meets our clients' objectives and is an extension of its natural surroundings. Our design teams, working through three key offices, have won more than 20 local, state, and national design awards, which is a testament to the quality of work we provide to all of our clients.

The architectural group brings extensive experience in the design of new building structures and the rehabilitation and restoration of current facilities. Our client list includes representatives of the private and public sector, and encompass commercial, institutional, federal, state, municipal and industrial projects. Project types include educational facilities, institutional facilities, sports and recreational facilities, museums, theatres, libraries and visitor's centers as well as multi-family and student housing projects. We also have historic preservation specialists and a certified code-enforcement official.

The engineering group provides services for a variety of local, state, and federal government and private clients. Project types include bridges, highways, roads, intersections, parks, trails, multi-use paths, stormwater management, environmental engineering, water systems, sewer systems, parking lots, and planning board review projects.

The surveying group handles professional land surveying needs for commercial and residential clients. Our expertise ranges from boundary surveys, ALTA/ACSM Land Title Surveys, 1A and 2C survey and certification of wireless telecommunication facilities to topographic surveys and high definition laser scanning for architectural and engineering support. Foit-Albert's survey field crews are equipped with current state-of-the-art equipment supported by CADD graphic workstations.
